

# 1.1 APIComponent

\1 Unical UPE System\1.1 APIComponent

## Level 2: Component diagram

Next you can zoom in and decompose each container further to identify the major structural building blocks and their interactions.

The Component diagram shows how a container is made up of a number of "components", what each of those components are, their responsibilities and the technology/implementation details.

**Scope:** A single container.

**Primary elements:** Components within the container in scope. Supporting elements: Containers (within the software system in scope) plus people and software systems directly connected to the components.

**Intended audience:** Software architects and developers.

**Notes:** uses component diagrams if you feel they add value, and consider automating their creation for long-lived documentation.
